Objective

A motivated individual seeking an internship opportunity to apply what I've learned, build strong problem-solving skills, and contribute to meaningful projects. I'm eager to gain hands-on experience in a real-world work environment and grow as part of a collaborative and high-performing team.

WORK EXPERIENCE

Mood-Aware Chat Companion

Developed an AI-Integrated Conversational Tool using Python and Flet. The application utilizes VADER Sentiment Analysis to classify user mood and dynamically customize LLM response prompts. Features specialized personas (e.g., Medical Consultant, Mentor) and integrated real-time Text to-Speech (Murf) and Voice Input (Speech Recognition).

FaceMatch - Face Detection

Developed a proof-of-concept facial detection application using the OpenCV library, focusing on matching and identifying faces in input streams. Implemented core computer vision techniques, for real-time processing and detection of facial features.

EDUCATION

Bachelor of Technology

School of Computer Science and Engineering

REVA University, Bangalore

Cgpa : 9.17

2023 - present

Pre-University Course (PCMB)

Nisarga PU College, Bengaluru, India

Percentage : 91.8%

2021 - 2023
